Welcome Message

The 16th International Symposium on Crystalline Organic Metals, Superconductors and Magnets (ISCOM2025) will be held in Toyohashi/Okazaki, Aichi, Japan, from September 28 to October 3, 2025.

The ISCOM is a long-running conference series in the field of conducting, magnetic, and dielectric molecular crystals started in Mittleberg (Austria, 1995), followed by Sesimbra (Portugal, 1997), Oxford (United Kingdom, 1999), Rusutu (Japan, 2001), Port-Bourgenay (France, 2003), Key West (United States, 2005), Peniscola (Spain, 2007), Niseko (Japan, 2009), Poznan-Gnieszno (Poland, 2011), Montreal (Canada, 2013), Bad Gogging (Germany, 2015), Miyagi (Japan, 2017), Tomar (Portugal 2019), Le Pouliguen (France 2022), and Anchorage (United Staes, 2024). We are looking forward to seeing you in Toyohashi/Okazaki for ISCOM2025.

Scope

The ISCOM symposium wil attract scientists across the world to present the latest advances and new avenues of research on the folowing topics related to molecular materials:

1. Synthesis of New Functional Materials
2. Superconductors
3. Magnets, Spin Liquids, Single Molecule Magnets
4. Dirac Electron Systems
5. pi-d Systems
6. Single-component Molecular Conductors
7. Physics of Low Dimensional Materials
8. Electron Correlation
9. Dielectric Properties
10. Non-equilibrium Phenomena
11. Electronic Devices Based on Molecular Materials
12. Photo-induced Phenomena
13. Luminescence
14. Theory, Modeling, and Computation
15. Molecular spintronics
16. Metal-organic-framework, Covalent-organic-framework
17. Chirality-induced phenomena
18. Thermoelectric properties
19. Informatics
20. Biomaterials

Conference Outline

- Sep.28 ISCOM Check-in / Welcome Reception
- Sep.29 Opening / Keynote 1 / Oral / Poster
- Sep.30 Keynote 2 / Oral / Poster
- Oct. 1 Keynote 3 / Oral / Poster
- Oct. 2 Oral / Excursion / Banquet
- Oct. 3 Keynote 4 / Closing
